

**REMARKS**

Claims 1-11 are pending in this application. By this Amendment, the specification is amended.

Applicants thank the Examiner for the indication that claims 1-11 are allowed. As discussed above, the specification is amended. No new matter is added. Favorable reconsideration and prompt allowance of the application is earnestly solicited.

The Office Action objects to the continuity information as recited in the specification.

The specification has been amended so that the continuity information is recited immediately after the title and is the first sentence of the specification. Moreover, the continuity information includes the current status of the parent non-provisional application and recites that the instant application is a divisional application. It is respectfully submitted that the continuity information, as recited in the specification, satisfies all formal requirements. Withdrawal of the objection to the continuity information is respectfully requested.

The Office Action asserts that the title of the invention is not descriptive.

The title has been amended to recite "Manufacturing Method for Organic Electroluminescent Device Including an Effectively Optical Area and an Organic Electroluminescent Layer, Organic Electroluminescent Device, ~~Manufacturing Method Therefor~~, and Electronic Devices Therewith." It is respectfully submitted that the title satisfies all formal requirements. Withdrawal of the objection to the specification is respectfully requested.

As discussed above, the Office Action indicates that the claims are allowed. Accordingly, prompt allowance of the application is respectfully requested.

Should the Examiner believe that anything further would be desirable in order to place this application in even better condition for allowance, the Examiner is invited to contact the undersigned at the telephone number set forth below.

Respectfully submitted,

James A. Oliff
